

Slow down your silent partners...

Acme's Electronic Golf Dingers

The "Electronic Golf Dinger" is a remote device with a master lockbox set up in your clubhouse under lock and key. Every time the ball drops through a hole funnel, the golf dinger registers the drop on the tamperproof counter, as well as

flashing a light to indicate the drop. In addition to the counter and light, a horn will automatically activate for free game ratifications

(depending on model selected).

**"MISS"
Hole
Cup**

**"IN"
Hole
Cup**

(2) Timed Horn Model Electronic Golf Dinger Ball in hole flashes light, sounds horn and 'hole in' counter registers. Should ball miss 'totaling' counter registers only. Also includes dual counter under lock and key in a tamperproof enclosure, and hole "IN" and "MISS" cups with heavy duty limit switches. Light and horn sounds for 3-5 seconds.

(1) Single Counter Model Electronic Golf Dinger Unit can be used in any hole. Ball in hole flashes light, sounds horn, and registers counter. Unit includes flash-light, alert horn, 6-digit counter under lock and key, in a tamperproof enclosure. In addition, one "IN" funnel with heavy duty limit switch.

(5) Single Silent Count Electronic Golf Dinger Unit can be used in any hole. Ball in-hole registers 'hole in' counter. Unit also includes 6-digit counter, under lock and key in a tamperproof enclosure, and one "IN" cup with heavy duty limit switch.
